*COLLINS & PERKINS,*

(No. 189, PEARL-STREET, NEW-YORK,)

*Printers and Importers of Medical Books to the New-York College of  
Physicians and Surgeons, and to the New-York Hospital.*

IN presenting the following catalogue to the public, the advertisers should state, that they have been induced to turn their attention to this department of the bookselling business, in consequence of the solicitations of many of the most respectable of the Faculty. The list here presented will shew with what assiduity they have pursued the object.

Whilst they respectfully solicit the further patronage of the Profession at large, the advertisers should, with gratitude, acknowledge the very extensive encouragement which they have already received. Their obligations are due, not only to the different medical professors and lecturers of this city, who, in their private capacity, have recommended their establishment, but also to medical institutions, which have promoted their undertaking, by officially constituting the advertisers their printers and medical booksellers.

The present catalogue, which is already much superior to any in the United States, will be constantly enlarged by the addition of every new work of merit that may appear either in England or America; the advertisers having established a correspondence which will

insure to them this important advantage, unless political differences with Europe, may operate to defeat it.

In forming this catalogue, care has been taken not to introduce a single book, that is not either already on hand, or that (being ordered from London, and the advertisers advised of an intention to ship it) is not very soon expected.

Though it shall be their unremitting endeavour to preserve their list entire, yet it will be apparent, that the extensive wholesale orders, which they receive from other booksellers, from public institutions, and from correspondents residing in distant parts of the United States, who are procuring their medical libraries, must sometimes break their assortment. These deficiencies, however, shall at all times be restored as early as possible.

It was intended, originally, to have had the *price* annexed to every article, but on further reflection, it was found that difficulties would be presented, which would render that measure very inconvenient. With a view of accommodating every description of purchasers, they have endeavoured to procure as great a variety of the same book as possible. Some of these being in boards, some bound in calf, some in sheep, and some being second-hand books, the prices must necessarily vary. The frequent alterations in the prices of the new editions of European works, must also occasion the importers' prices to change. But these difficulties do not exist with respect to American editions; and to them, therefore, the prices are annexed. This circumstance will enable the reader to distinguish American from imported books.

With regard to charges, those for American books, it is obvious, must be regulated by the price adopted by their publishers; but foreign books are priced by the importer. To those of the Faculty who have already dealt with the advertisers, it will be sufficient to observe, that they pledge themselves to continue to sell on the same favourable terms as heretofore. That every satisfaction, however, may be given on this head, their invoices, consisting of the sterling cost, shall, as heretofore, be cheerfully offered for the inspection of their customers.

Upon *American* editions, (periodical publications and a few others excepted) liberal discounts will be allowed to wholesale purchasers; but upon *imported* books, such are their present reduced retail prices, that but a very small discount can be afforded. Did the advertisers adopt the practice of marking imported books as much above their *cost*, as booksellers generally do those of American origin, the same large discounts could with equal propriety be allowed; but they apprehend that such a system is not calculated to dispense equal justice to all, nor to enable the purchaser of a single book to possess himself of it at a price for which it can be fairly afforded.

To facilitate the reader's search after new works, or recently improved editions, the letter (n.) is placed before all of that description.

Collins & Perkins will shortly publish, in a handsome duodecimo volume, A DISSERTATION ON THE MINERAL WATERS OF SARATOGA. Second edition, enlarged—Including an Account of the WATERS OF BALLTON. Embellished with a Map of the surrounding Country, and a View of the *Rock Spring* at Saratoga—By VALENTINE SEAMAN, M. D. one of the Surgeons of the New-York Hospital.

"What dire necessities on every hand  
 "Our art, our strength, our fortitude require!  
 "Of foes intestine, what a numerous band  
 "Against this little throb of life conspire!  
 "Yet *Science* can elude their fatal ire  
 "A while, and turn aside death's level'd dart,  
 "Soothe the sharp pang, allay the fever's fire,  
 "And brace the nerves once more, and cheer the heart,  
 And yet a few soft nights and balmy days impart."

*Beattie.*

The following remarks, in allusion to this edition, are extracted from the *Monthly Register and Review* of the United States, vol. ii. p. 308.

"The work before us demands notice, as being the *first* decisive and spirited national attempt, in *this* country, to promote the progress of the fine arts, and to cherish the efforts of genius which are directed to the embellishment of society. As a specimen of excellent and splendid typography, this Bible may vie with any production of the most celebrated European presses. The publishers deserve, and no doubt will receive, the applause and patronage of the American public."

The Directors of the American Academy of Arts, in adjudging a gold medal for one of the engravings in this work, addressed, through the medium of Col. Trumbull, one of the Board, the following remarks to the publishers.

"I am charged, gentlemen, to convey to you the expression of the high satisfaction with which the Directors viewed these specimens of rapid improvement in the art of engraving. Judging from this first exhibition, they cannot but indulge the hope of soon seeing this branch of the polite arts carried to a degree of perfection in America, which shall excite the surprise and even the emulation of Europe."

To the foregoing may be added an extensive collection in the various departments of *SCIENCE* and *LITERATURE*; some of which are among the most elegant works ever executed. On this list are the following :

Bowyer's superb edition of Hume's History of England, 5 very large volumes, folio, with splendid Engravings. (This work is published under the patronage of the British government, parliament having granted sixty-eight thousand pounds, sterling, to defray its expences. Price in London, one hundred guineas.)

Bowyer's superb edition of Mayer's Views in Egypt, elegantly coloured engravings, large folio. Price in London twenty-five guineas.

Serres's Little Sea Torch, folio. (This elegant, and to mariners, highly valuable work, was published by the British Admiralty, for the use of the officers of the navy. It contains upwards of one hundred coloured views of the coasts of England, Ireland, France, Spain, and the European shores of the Mediterranean, and plans of all the principal Harbours.)

Woodward's Eccentric Excursions, 4to. (This is an admirable collection of Caricatures, illustrative of a tour through England and Wales.)

### CLASSICAL AND SCHOOL BOOKS.

Booksellers, Teachers, and Country Dealers, supplied on the most favourable terms. The advertisers' editions of LINDLEY MURRAY's various works, are handsomely and CORRECTLY executed from the English copies, with the author's latest improvements. The following is a list :

The following is an extract of a letter from Lindley Murray, dated sixth Mo. (June) 1807. "I am much indebted to *Collins & Perkins* for the neat and correct manner in which they reprint my publications; and for their care and exertions to exhibit the books as THEY WERE PUBLISHED BY THE AUTHOR, and especially with HIS latest improvements. I shall make it a point to communicate to them, from time to time, and as early as possible, copies of all the new and improved editions of the books. It affords me a peculiar gratification to perceive, that my publications are so extensively diffused over my native country."

PRINTING. *Collins & Perkins* being provided with excellent materials, and having had considerable experience in printing the French, Latin, Greek, and Hebrew Languages, offer their services to print any work which may require a knowledge of those Languages to execute it with accuracy.
